Configuring Windows to use High Graphic Performance

1. In the Windows Search Bar (or Start Menu), search Graphics Settings and open it.

2. In **Graphics Settings**, choose **Desktop App** in the Preference dropdown, then click **Browse**.

3. In the Open window, enter the Path where the User's running instance of **CETDesigner.exe** resides.

Configuring Windows to use High Graphic Performance

For the Official version of CET, this is... %LOCALAPPDATA%\CET Data\64-bit\Application\cet.runtime\bin\win64
