

# **Knoll Design and Specification Update Report for December 2025**

## **General Notes:**

This month you will see changes in the Knoll and Muuto product data as we begin to align with our broader MillerKnoll standards. The key changes for December alignment are:

1. The removal of historical list pricing
2. The addition of Canadian list pricing

With these changes price zones can no longer be used to obtain historical list pricing. In CAP moving forward the Pricing Center must be used. Support for NET pricing will be available soon. Additional communications will be distributed to explain the details on when and how to access Net Pricing.

## **Discontinuation Notice**

The Template product line has been discontinued. The commercial and GSA catalogs have been removed from the distribution. Please remove these from your computer.

The Knoll Special Charges catalog has been discontinued.
